

Harvest Price List - 2023-2024

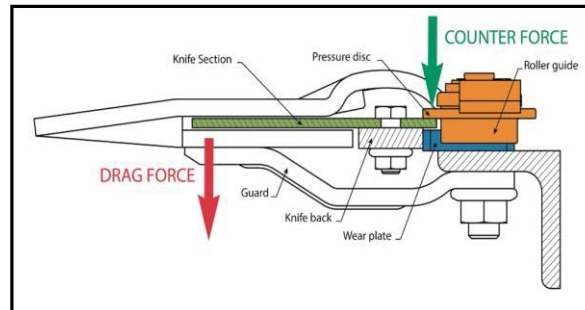

SCHUMACHER "EASY CUT" CUTTING SYSTEM

The Schumacher EASY-CUT Cutting System is commonly fitted as original equipment on many brands, including Claas, Deutz & HoneyBee. It was designed and built as a strong & robust cutting system capable of handling the heavy crops in Western Europe.

The Schumacher Cutting System is modular by design: adaptable to almost any header front available in Australia. The system comprises three main components: the Guards - welded, and bolted top and bottom; the wear bars or bridge rollers; and the knife back.

The knife back is carried on wearbars or bridge rollers, which may be easily and economically changed as required. This allows for extended use of the guards. Sections are bolted "one up, one down". As the knife passes the anvil of the guard, one section will pull the knife up, the next will pull the knife down, which in turn results in a more balanced knife operation, reduced load and stress on the knife drive, superior cutting performance, and a more even wear across the guards & knife.

SCHUMACHER CONVERSION KITS

These Schumacher Conversion Kits may be used to replace some original cutting systems - eg Honeybee, MacDon etc.

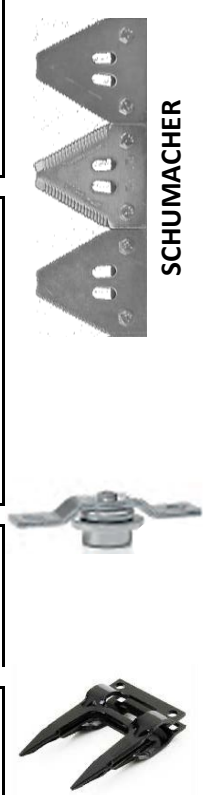

The **PREMIUM** kit comes with both top and bottom rollers, while the **COMFORT** kit only has top rollers. The Comfort system can be converted to a Premium system later

The 12mm Conversion Kit includes a replacement knife (See Page 6), all guards, wearbars/spacer plates, rollers, knife head/s (only HoneyBee) and fasteners

The 14mm Conversion Kit also includes the above, EXCEPT it does not include the knife head/s.

The replacement knife will need to be trimmed to size. Other size Conversion Kits are also available - POA

SCHUMACHER CROPLIFTERS

The Schumacher croplifter is available to suit most finger guards used in Australian harvesting operations. They are quick and easy to fit, increasing machine and operator efficiency at the peak of harvest. Height and/or angle adjustment is achieved quickly and easily by repositioning the spring clip to one of the three operating positions. (pictured below)

Choosing a croplifter to fit your guard

For the best fitting of the croplifter just follow these two simple steps.

1. Measure the guard length - from centre of the bolt hole to the tip of the point. (shown above)
2. Select the croplifter which best matches the guard length and choose the croplifter from the list below.

Part No.	Description	RRP \$ per ea

SCHUMACHER PRO FLEX PULSE CROP LIFTERS

PRO FLEX LIFTER
by SCHUMACHER.

FOR FLEX FRONTS ONLY

PRO FLEX LIFTER
by SCHUMACHER.

This NEW crop lifter from Schumacher is designed for all pulse crops. The fully adjustable lifter fits most guards. The replacement finger means you no longer need to replace the entire crop lifter.

With the specially designed slot, the PRO FLEX lifter can fit perfectly on most types of guards. That's why the Schumacher pulse lifter guarantees a tight fit. Suitable for those hard to fit fronts eg MacDon D60, 2152
Ideal for all pulse crops

5 good reasons for PRO FLEX

- 1 Schumacher pulse lifters guarantee a tight fit on all popular guards
- 2 Crop lifter finger can be easily seen in the crop due to white colored material
- 3 High quality lifter finger ensures longer life and reduced distortion
- 4 Crop lifter finger is adjustable in length
- 5 Finger angle is also adjustable

PRO FLEX LIFTERS ARE ONLY SUITABLE FOR FLEX FRONTS

INFORMATION

Due to diverse header types, different mounting kits are available. Refer to the Mounting Kits page for the correct kit, or for more information, go to:

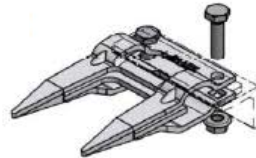

www.agpoint.com.au

www.schumacher-original.com

PRO FLEX LIFTER
by SCHUMACHER

STEP 1

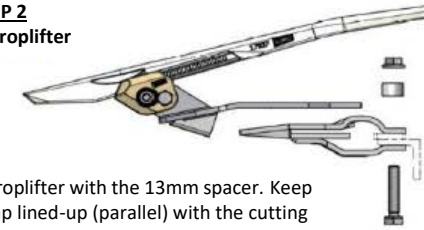

Remove bolts

Remove existing bolts. It is recommended that you mount one *Pro Flex* croplifter on every 4th guard tip (every second guard)

STEP 2

Mount croplifter

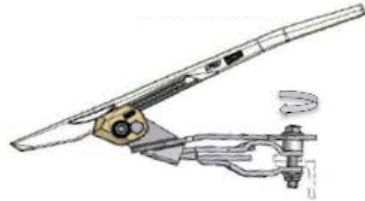

Mount the croplifter with the 13mm spacer. Keep the lifter strap lined-up (parallel) with the cutting gap on the guard

You may need to add flat washers on some guards

STEP 3

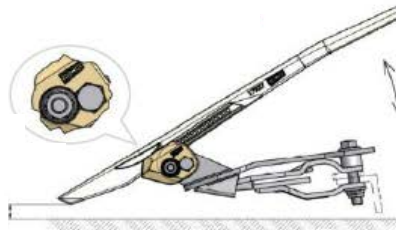

Push lifter all the way in, tighten nuts to 45Nm (33ft/lb)

STEP 4

To change the angle, undo nuts on both sides

Undo left and right side nuts

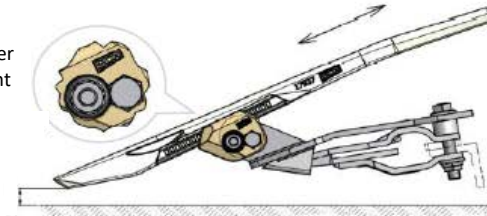

15-20mm

STEP 5

To change length, undo one nut only

Undo either left or right nut

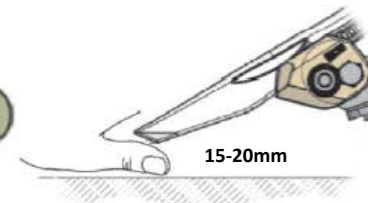

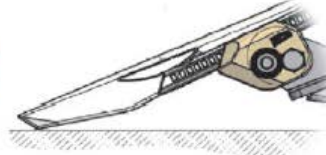

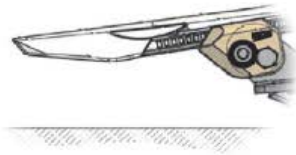

15-20mm

PRO FLEX LIFTER
by SCHUMACHER

General mounting instructions for *Pro Flex* croplifter, dependant on guard and Mounting Kit

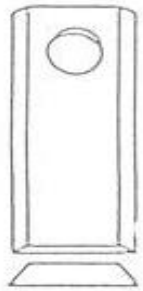

Mount croplifters (usually every 4th guard tip or every 2nd guard) and lower the header front to working position. Adjust the croplifters to get a 15-20mm clearance with the ground (approx width of a thumb) as shown below.

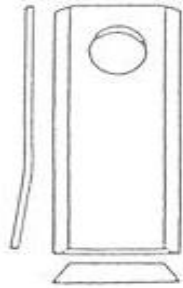

15-20mm

Rasspe Mower Blades are made in Solingen, Germany. Solingen is renowned as the capital of knife and blade manufacture; many consider that the world's best blades come from Solingen. Rasse has over 170 years of manufacturing experience and today supplies blades for mowers, straw choppers, fodder mixers and Twine Knotters for late model Balers to the major O.E.M.s of Europe.

Rasspe is proud to be part of the Schumacher Group.
